

Maintenance Engineer – Full Time (Nights)

Dual Seal Glass are the UK's leading independent processors of High Performance Vision and Insulated Spandrel Glass Panels for the construction industry.

Our glass has been used in many iconic projects across the Country including universities and colleges, leisure centres, football clubs, hospitals, hotels and offices.

We are a family run business that place importance on the development and safety of our employees and are committed to quality and customer service. Due to continued success we are looking to appoint a full time Maintenance Engineer to join our award-winning team based in Huddersfield.

This role will be to work either Sunday to Thursday 10pm to 6am or Monday to Friday 10pm to 6am, the successful candidate can choose.

About the role

- Maintain production equipment to ensure minimum downtime
- Routine preventative maintenance
- General maintenance duties, both proactive and reactive
- Fast and accurate fault finding
- Carrying out electrical and diagnostic checks
- Communicate with management team and production team

About You

- Experience in mechanical and electrical engineering with relevant qualifications
- Previous experience in a manufacturing environment
- Possess an excellent understanding and commitment to safe working practises
- Positive, flexible attitude
- Excellent problem analysis and communication skills
- High standard of work and commitment to quality

The benefits

- Excellent rates of pay
- 20 days holiday (plus bank holidays)
- Pension
- Opportunity to gain qualifications and learn
- Free on-site parking
- Canteen facility
- Opportunity for overtime

To apply
